

FAILED WET WALL WATER PROOFING INSPECTION FORM

General Contractor's Letter Head
Address
Certification #
Phone number

ATTN: (Homeowner's Name)
Permit Number:
Job Address:

In reference to the above permit issued by the City of Boca Raton, on _____ (Date) the inspection "Plumbing Wet Wall Water Proofing" has FAILED because such inspection had to be done prior to the installation of any tiles in the shower or tub wet walls. In order to "Pass" the inspection, we (General Contractor's Name) are required by the Building Official to hire a Registered Engineer (at no cost to the Homeowner) to perform an inspection of the wet wall area under the following conditions;

1. Explain how the Wet Wall Water Proofing was installed and what methods were used to discover the waterproofing installation, per the manufacture specifications and the Florida Building Code.
2. Type of waterproofing product.
3. Provide Photos of the inspection process. Including one of the entire floors to ceiling area for the wet walls.
4. Provide a letter from the Engineer on the Engineer's Letter Head Signed and Sealed stating the findings of fact.
5. Provide all photos and documents to the Inspector as a field revision to be approved.

The Homeowner is not required to accept the Engineer's inspection and can require the General Contractor to remove to the studs the Wet Walls and reinstalled with the proper inspections at his expense.

Regards,
